

Frontend Engineering Assessment: Athelas Landing Page Clone

This assessment requires the development of a pixel-perfect clone of the Athelas landing page (<https://www.athelas.com>). The goal is to evaluate the candidate's proficiency in modern frontend development techniques, attention to detail, and ability to reproduce complex UI/UX elements, including animations and responsive design.

General Requirements

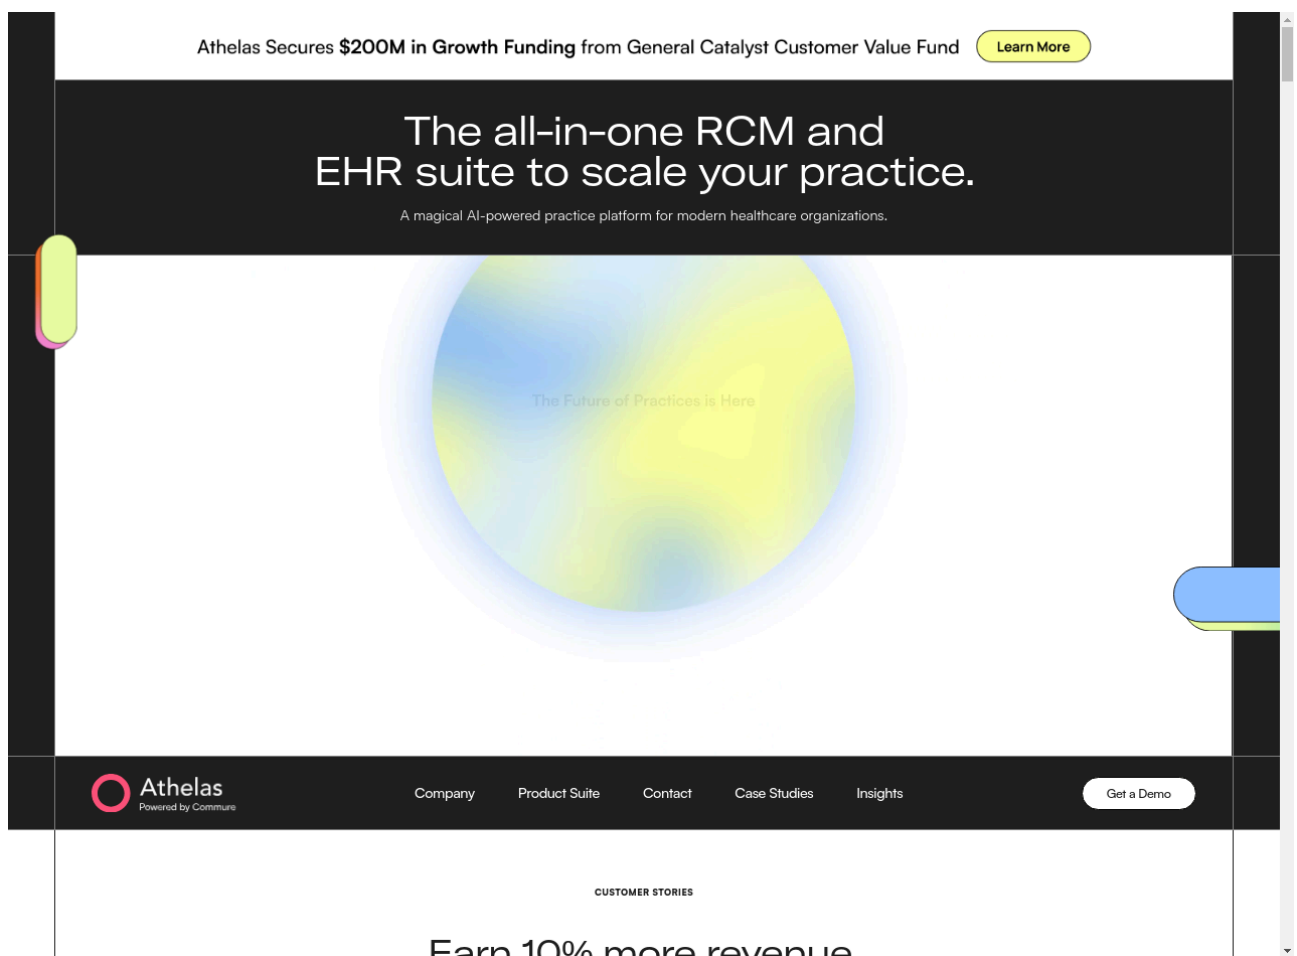

- **Pixel-Perfect Reproduction:** The cloned page should visually match the original Athelas landing page as closely as possible across various screen sizes.
- **Responsive Design:** The layout must adapt seamlessly to different devices (desktop, tablet, mobile).
- **Interactive Elements:** All interactive elements (e.g., navigation links, buttons, carousels) should function as they do on the original site.
- **Animations:** All animations and transitions present on the original site must be accurately reproduced.
- **Placeholder Assets:** For any images, videos, or complex graphical assets, the candidate should use empty, grayed-out `div` elements as placeholders. These placeholders should maintain the original asset's dimensions and aspect ratio.
- **Code Quality:** The code should be clean, well-structured, and maintainable, following best practices for the chosen framework/library.
- **Performance:** The page should load efficiently and provide a smooth user experience.

Section-by-Section Breakdown

Each section of the Athelas landing page is detailed below with screenshots and specific requirements. The candidate should pay close attention to typography, spacing, colors, and interactive behaviors.

1. Header and Hero Section

Screenshot:

Description:

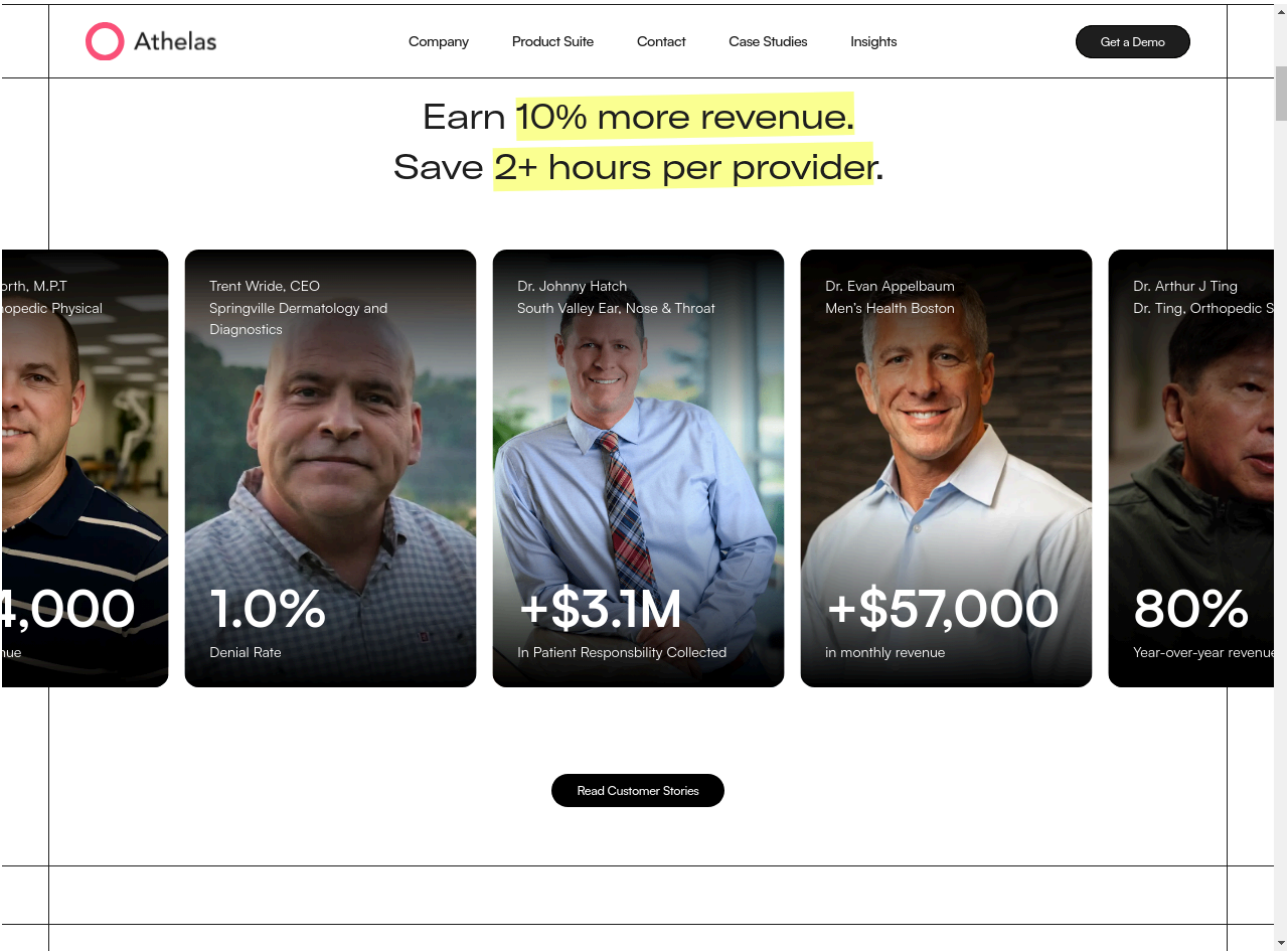

This section includes the top banner announcing funding, the main navigation bar, and the primary hero content. The hero section features a prominent title, a subtitle, and an interactive element displaying 'AI Agent on call' with an animated globe and a text input area. The navigation bar includes links for 'Company', 'Product Suite', 'Contact', 'Case Studies', 'Insights', and a 'Get a Demo' button.

Requirements:

- **Top Banner:** Replicate the green banner with the funding announcement and the 'Learn More' button. The button should be functional (can link to a placeholder page).
- **Navigation Bar:** Implement the navigation links and the 'Get a Demo' button. The Athelas logo should be present. All links can point to placeholder pages.
- **Hero Content:** Reproduce the main title, subtitle, and the 'AI Agent on call' text. The animated globe and the text input area should be represented by grayed-out `div` placeholders that maintain their original dimensions and visual appearance (e.g., rounded corners, shadows).
- **Animations:** The subtle animation of the globe and the typing animation in the text input area should be accurately reproduced.

2. Customer Stories and Metrics Section

Screenshot:

Description:

This section highlights customer testimonials and key performance metrics. It features a prominent headline

like "Earn 10% more revenue. Save 2+ hours per provider." followed by a carousel of customer testimonials with associated metrics and a 'Read Customer Stories' button.

Requirements:

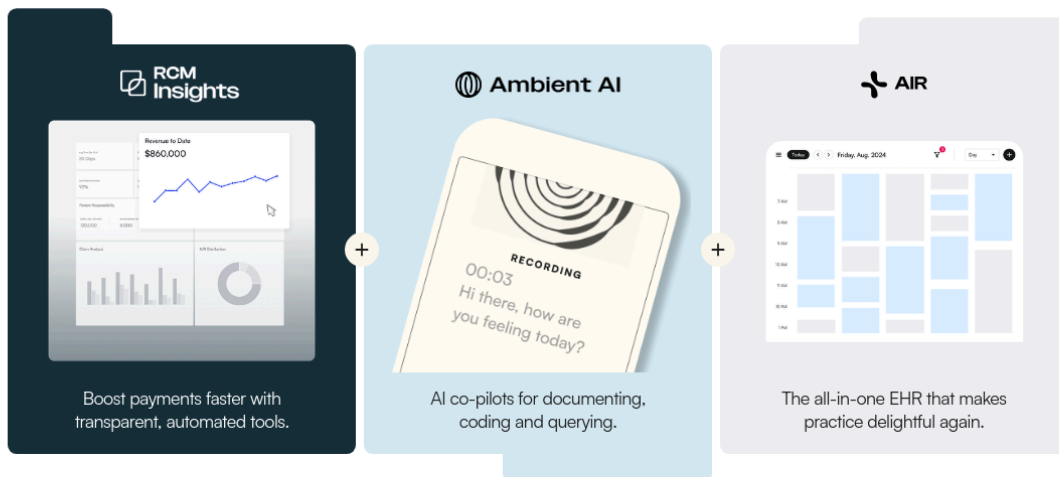

- **Headline:** Reproduce the main headline and sub-headline accurately.
- **Customer Testimonial Carousel:** Implement a functional carousel that displays customer testimonials. Each testimonial card should include a placeholder for the customer's image (grayed-out `div`), their name, title, and the associated metric (e.g., "+\$57,000 in monthly revenue").
- **Navigation:** The carousel should have navigation controls (e.g., arrows or dots) that allow users to browse through testimonials.
- **Animations:** The smooth transition between testimonial cards in the carousel should be reproduced.
- **Button:** The 'Read Customer Stories' button should be present and functional (can link to a placeholder page).

3. Product Deep Dive Section

Screenshot:

PRODUCT DEEP DIVE

Three mighty products. One brilliant package.

Description:

This section introduces the three main products: RCM Insights, Ambient AI, and AIR. Each product is presented with a title, a brief description, and a visual representation. The section emphasizes "Three mighty products. One brilliant package."

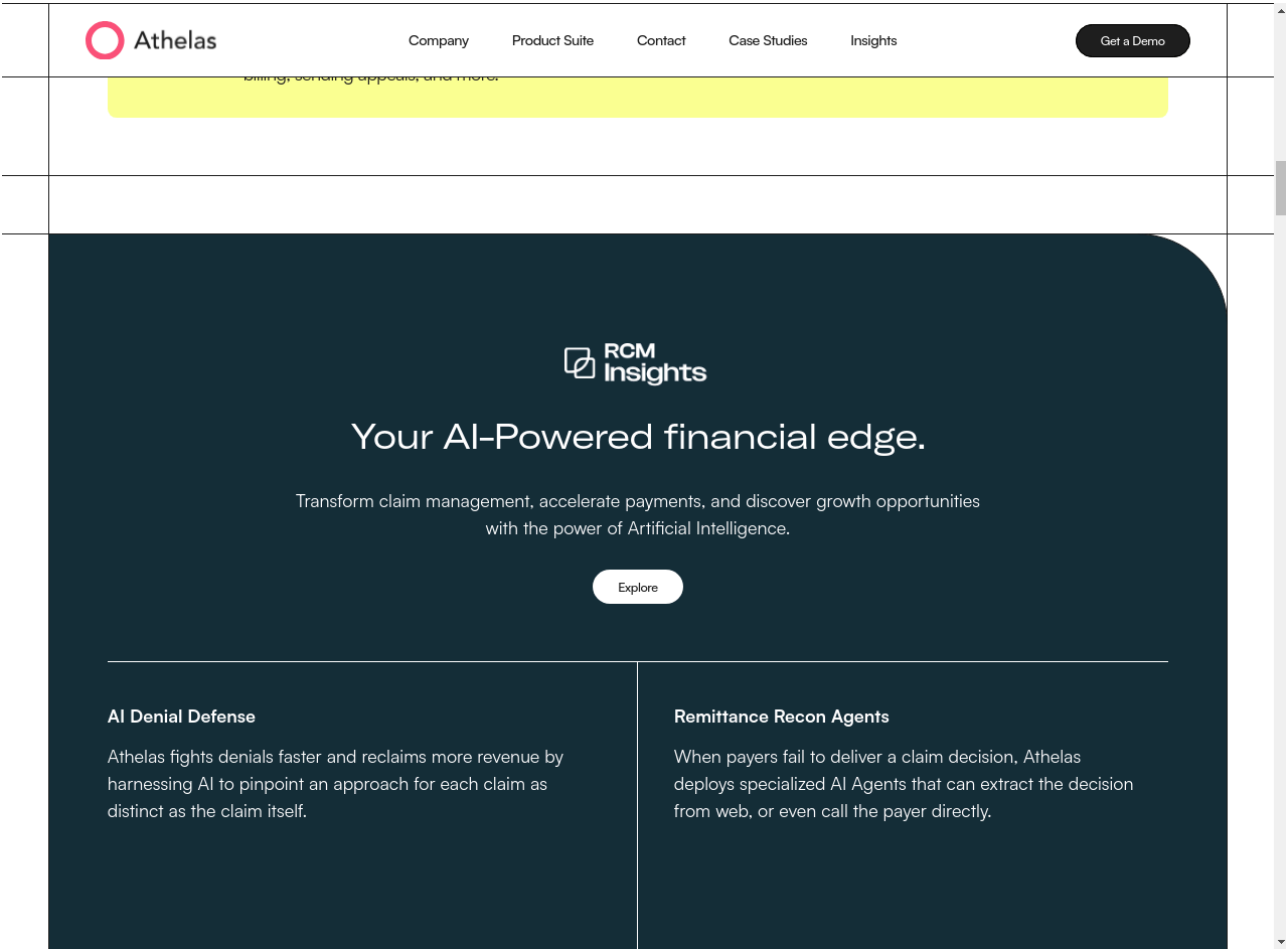

Requirements:

- **Headline:** Reproduce the headline "Three mighty products. One brilliant package."
- **Product Cards:** Implement three distinct product cards for RCM Insights, Ambient AI, and AIR. Each card should include:
 - A placeholder for the product logo/icon (grayed-out `div`).
 - The product name.
 - A brief descriptive text.
 - A placeholder for the product screenshot/illustration (grayed-out `div`) that maintains the original dimensions and aspect ratio.

- **Layout:** The cards should be arranged in a visually appealing layout, similar to the original page.
- **Animations:** Observe and reproduce any hover effects or subtle animations associated with these product cards.

4. RCM Insights Detailed Section

Screenshot:

Description:

This section provides a deeper dive into RCM Insights, focusing on its AI-powered financial edge. It includes a main title, a descriptive paragraph, an "Explore" button, and two sub-sections: "AI Denial Defense" and "Remittance Recon Agents." Each sub-section has a title and a descriptive paragraph.

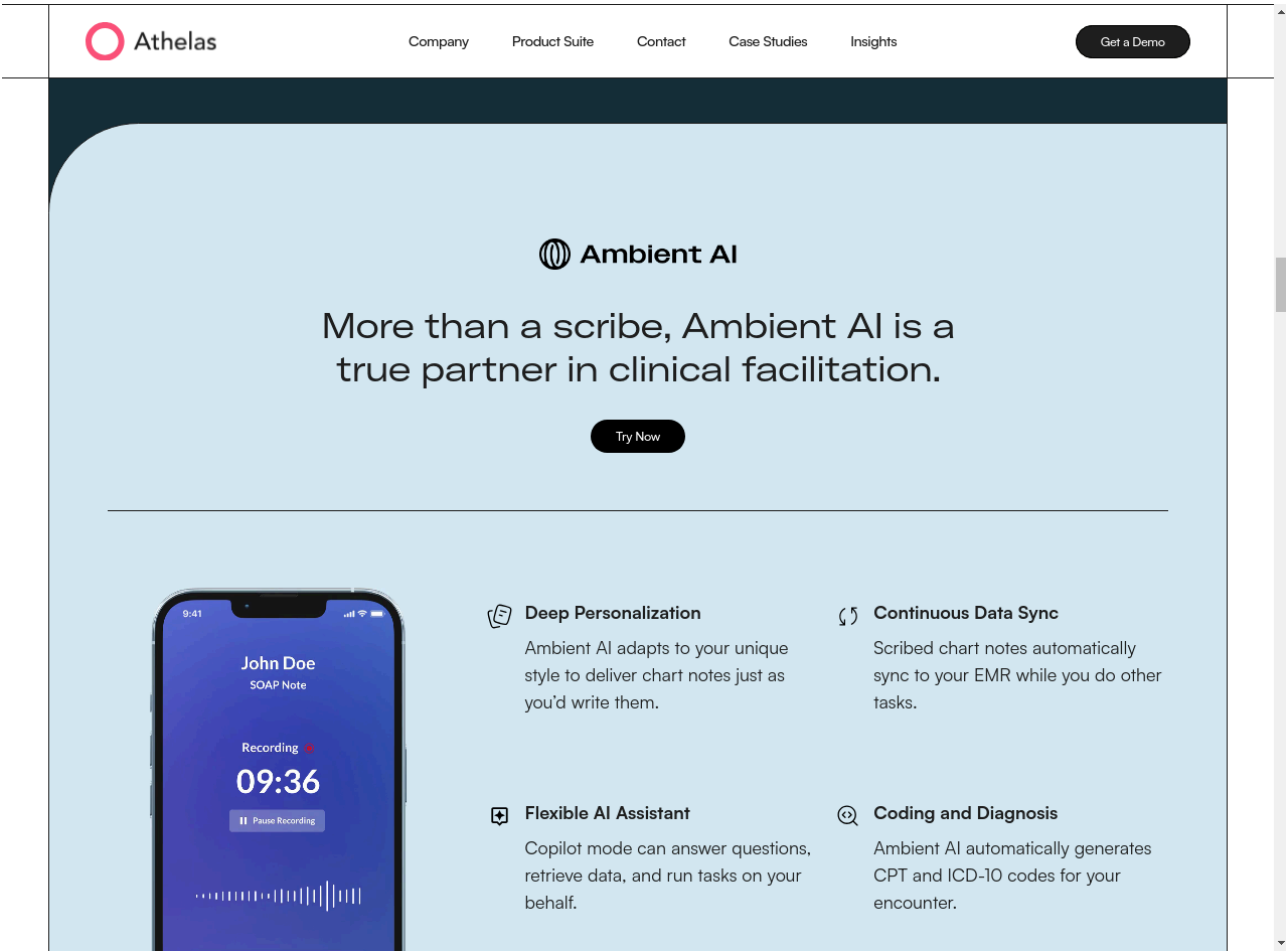

Requirements:

- **Main Content:** Reproduce the main title "Your AI-Powered financial edge." and the accompanying descriptive text.

- **Explore Button:** Implement the "Explore" button. It can link to a placeholder page.
- **Sub-sections:** Create two distinct sub-sections for "AI Denial Defense" and "Remittance Recon Agents." Each should have its title and descriptive text.
- **Visual Elements:** The background of this section has a distinct dark color and rounded corners. The visual elements within the sub-sections (e.g., the denial card and the Sophia Brown image) should be represented by grayed-out `div` placeholders that maintain their original dimensions and visual appearance.
- **Animations:** Any subtle animations or transitions within this section, such as the visualizer next to "My name is Sophia Brown, SB.", should be reproduced with placeholder animations.

5. Ambient AI Detailed Section

Screenshot:

Description:

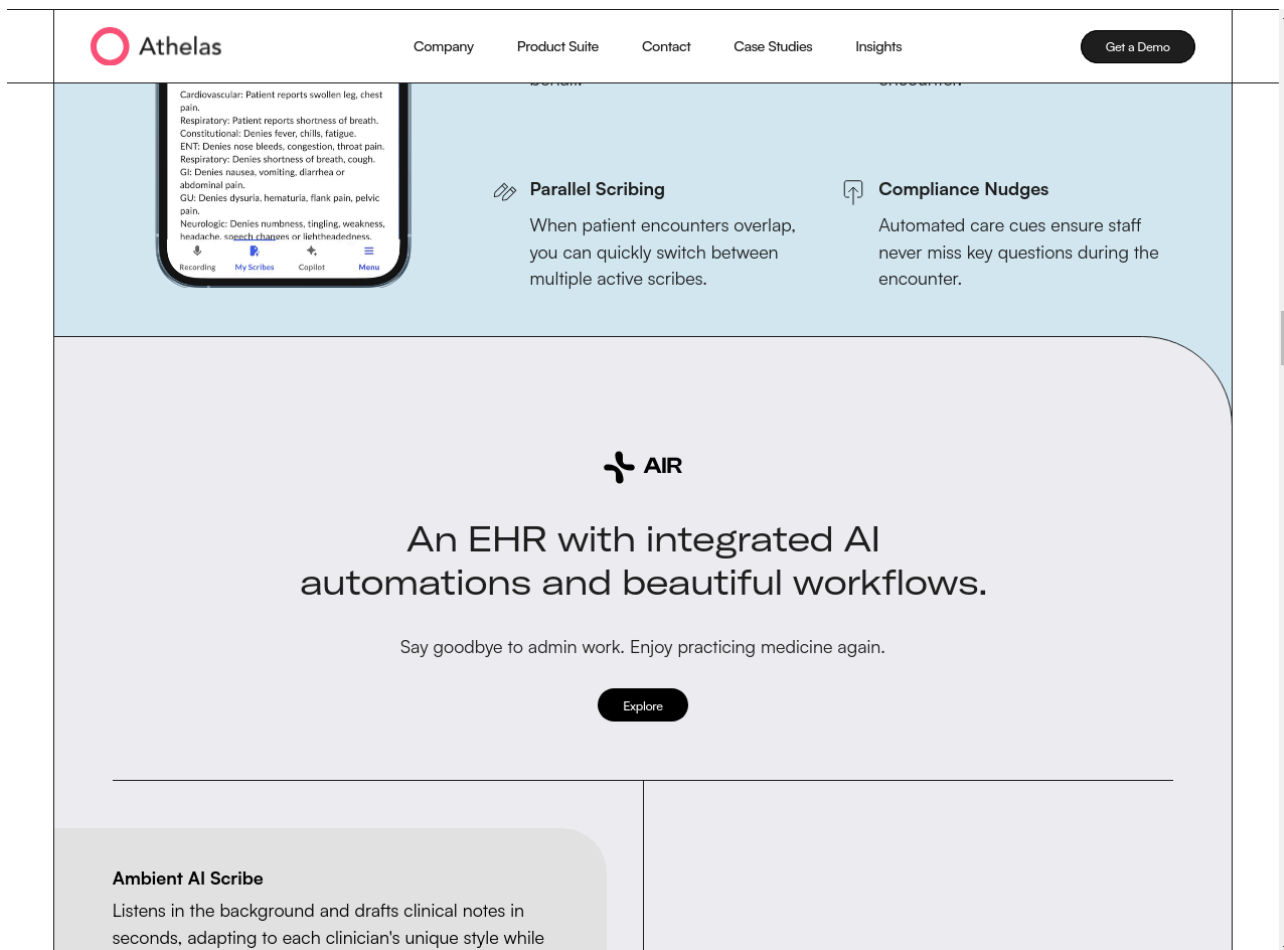

This section focuses on Ambient AI, described as "More than a scribe, Ambient AI is a true partner in clinical facilitation." It features a main title, a descriptive paragraph, a "Try Now" button, and several sub-sections detailing its capabilities: "Deep Personalization," "Continuous Data Sync," "Flexible AI Assistant," and "Coding and Diagnosis."

Requirements:

- **Main Content:** Reproduce the main title and descriptive text for Ambient AI.
- **Try Now Button:** Implement the "Try Now" button, linking to a placeholder page.
- **Sub-sections:** Create sub-sections for each capability, including their titles and descriptive text.
- **Visual Elements:** The mobile phone illustration with the recording interface should be represented by a grayed-out `div` placeholder, maintaining its dimensions and visual style.
- **Animations:** Any animations related to the recording interface or other elements within this section should be reproduced with placeholder animations.

6. AIR Detailed Section

Screenshot:

Description:

This section focuses on AIR, an EHR with integrated AI automations and beautiful workflows. It features a main title, a descriptive paragraph, an "Explore" button, and two sub-sections: "Parallel Scribing" and "Compliance Nudges."

Requirements:

- **Main Content:** Reproduce the main title "An EHR with integrated AI automations and beautiful workflows." and the accompanying descriptive text.
- **Explore Button:** Implement the "Explore" button, linking to a placeholder page.
- **Sub-sections:** Create two distinct sub-sections for "Parallel Scribing" and "Compliance Nudges." Each should have its title and descriptive text.
- **Visual Elements:** The mobile phone illustration with the EHR interface should be represented by a grayed-out `div` placeholder, maintaining its dimensions and visual style.
- **Animations:** Any animations related to the EHR interface or other elements within this section should be reproduced with placeholder animations.

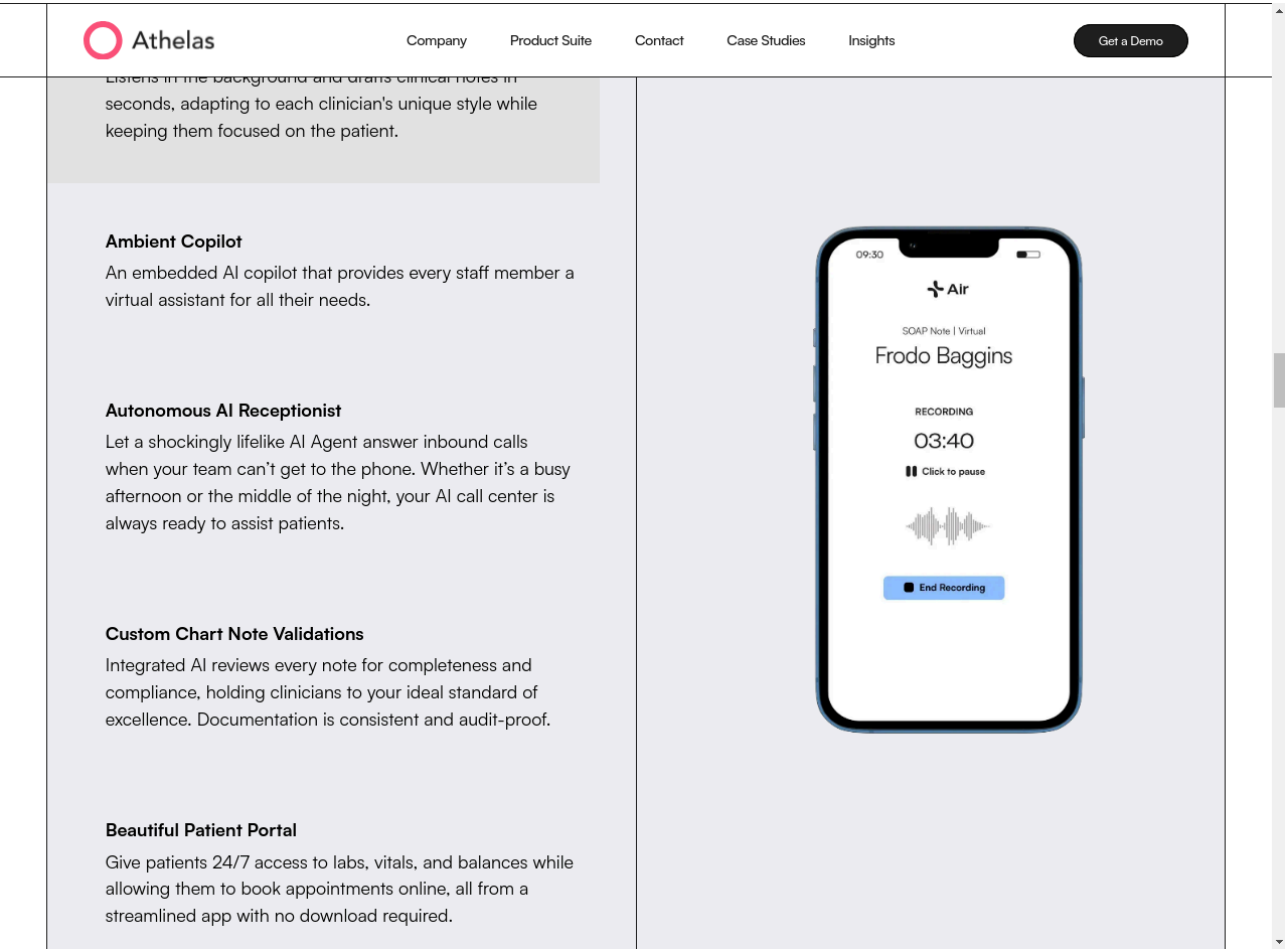

7. Additional AIR Features

Description:

This section further details the features of the AIR product, including various AI-powered tools designed to streamline clinical workflows.

7.1 Ambient AI Scribe

Screenshot:

Description:

This sub-section describes the Ambient AI Scribe, which listens in the background and drafts clinical notes, adapting to the clinician's unique style.

Requirements:

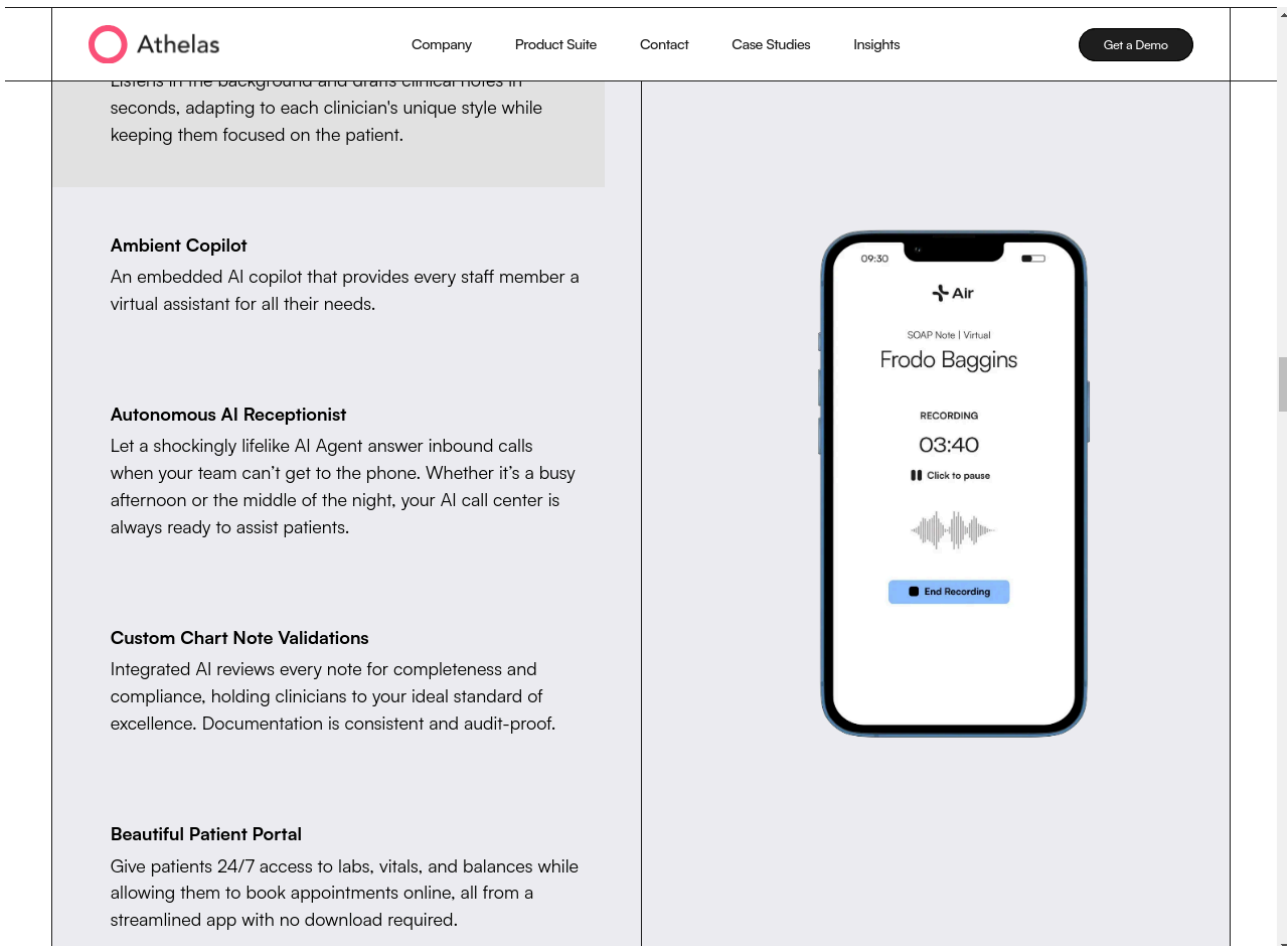

- **Content:** Reproduce the title and descriptive text.
- **Visual Elements:** The mobile phone illustration showing the scribe interface should be represented by a grayed-out `div` placeholder, maintaining its

dimensions and visual style.

- **Animations:** Any animations related to the scribe functionality should be reproduced with placeholder animations.

7.2 Ambient Copilot

Screenshot:

Description:

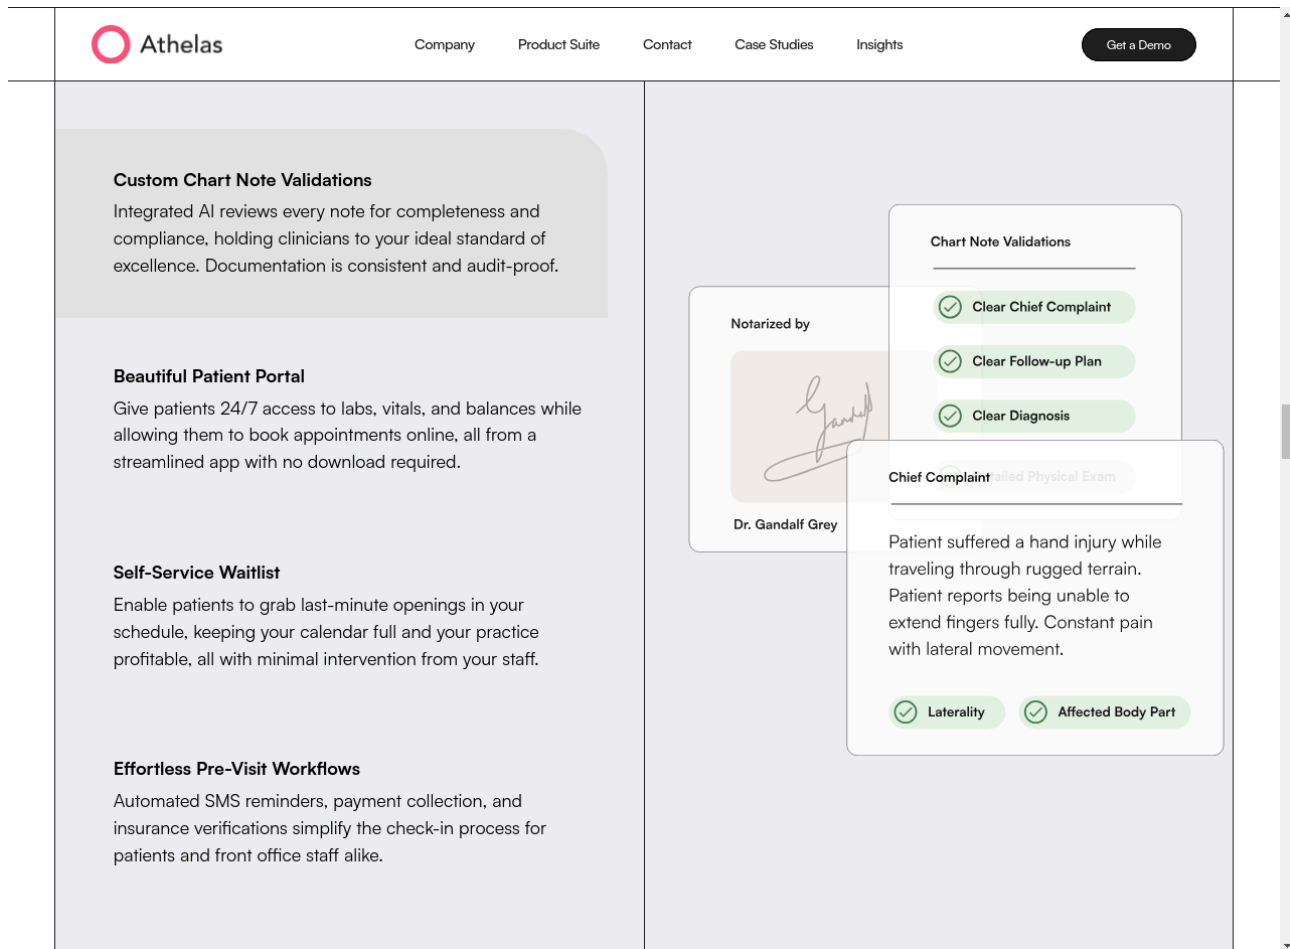

This sub-section describes the Ambient Copilot, an embedded AI copilot that provides every staff member a virtual assistant for all their needs.

Requirements:

- **Content:** Reproduce the title and descriptive text.
- **Visual Elements:** No specific visual element for this sub-section in the provided screenshot, but ensure consistent styling with other feature descriptions.

7.3 Autonomous AI Receptionist

Screenshot:

Description:

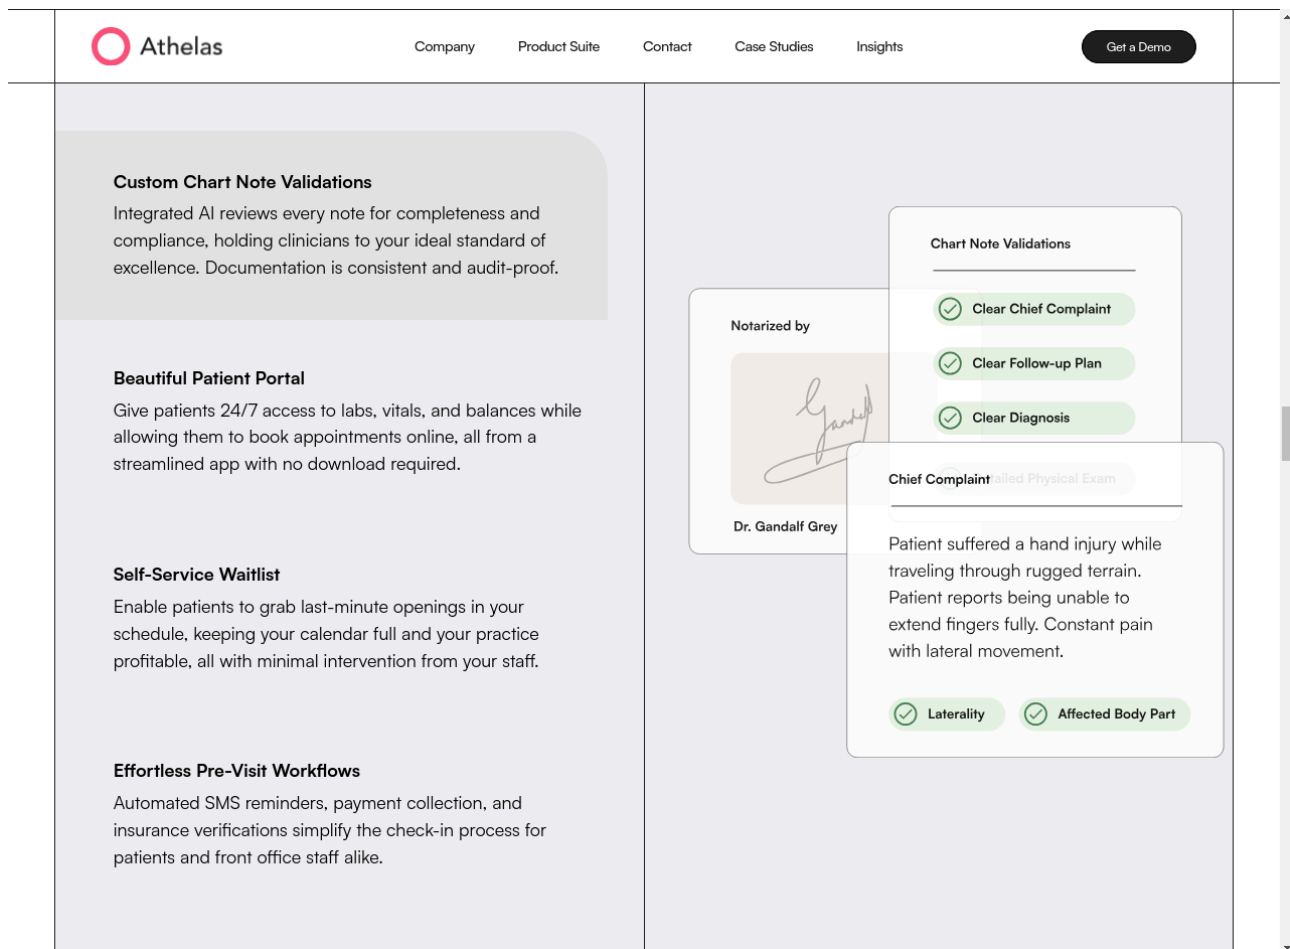

This sub-section describes the Autonomous AI Receptionist, a shockingly lifelike AI Agent that answers inbound calls when the team can't get to the phone.

Requirements:

- **Content:** Reproduce the title and descriptive text.
- **Visual Elements:** The mobile phone illustration showing the AI Receptionist interface should be represented by a grayed-out `div` placeholder, maintaining its dimensions and visual style.
- **Animations:** Any animations related to the AI Receptionist functionality should be reproduced with placeholder animations.

7.4 Custom Chart Note Validations

Screenshot:

Description:

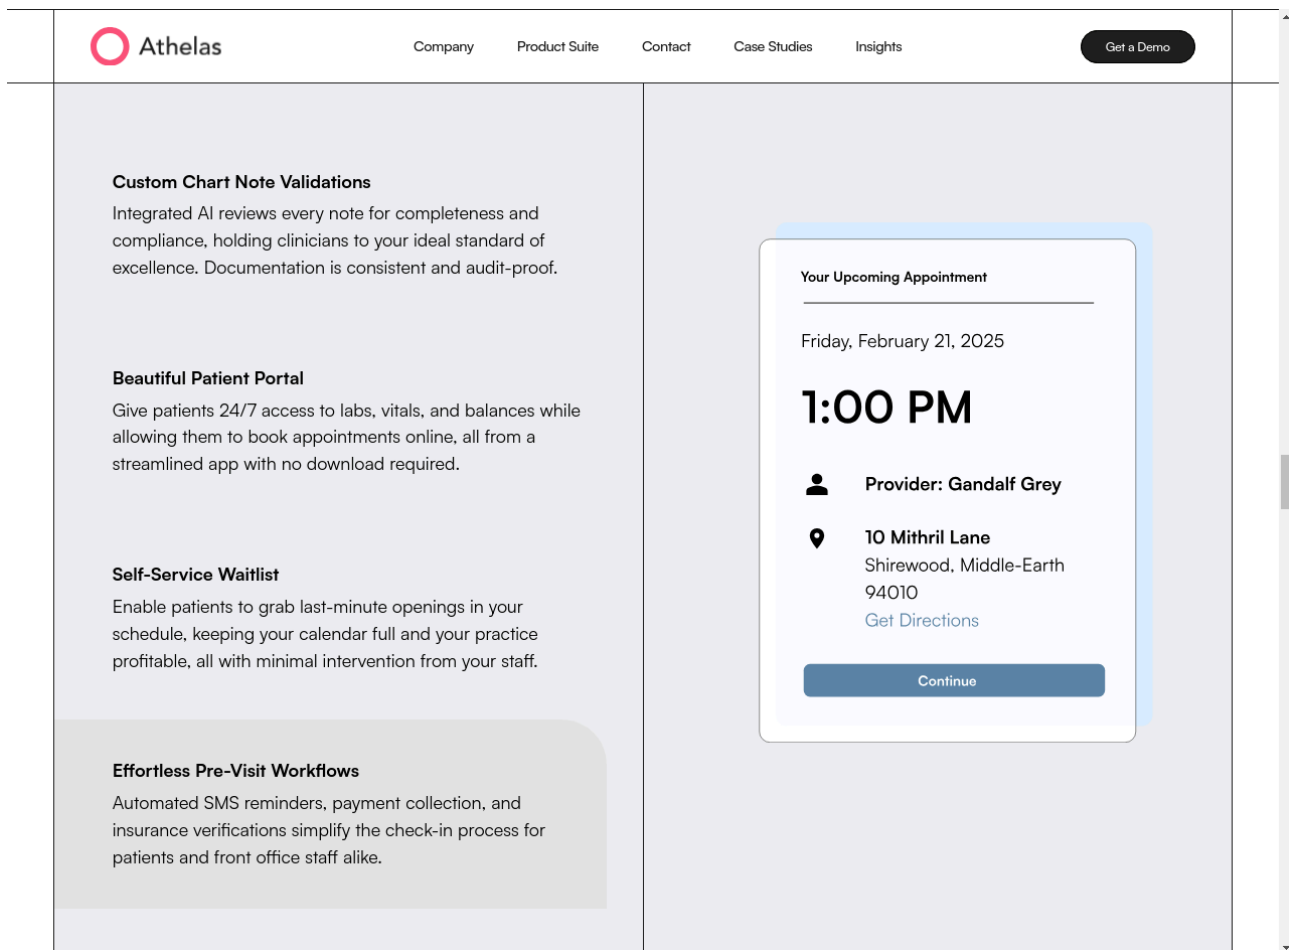

This sub-section describes Custom Chart Note Validations, where integrated AI reviews every note for completeness and compliance.

Requirements:

- **Content:** Reproduce the title and descriptive text.
- **Visual Elements:** The chart note validation interface should be represented by a grayed-out `div` placeholder, maintaining its dimensions and visual style.
- **Animations:** Any animations related to the validation process should be reproduced with placeholder animations.

7.5 Beautiful Patient Portal

Screenshot:

Description:

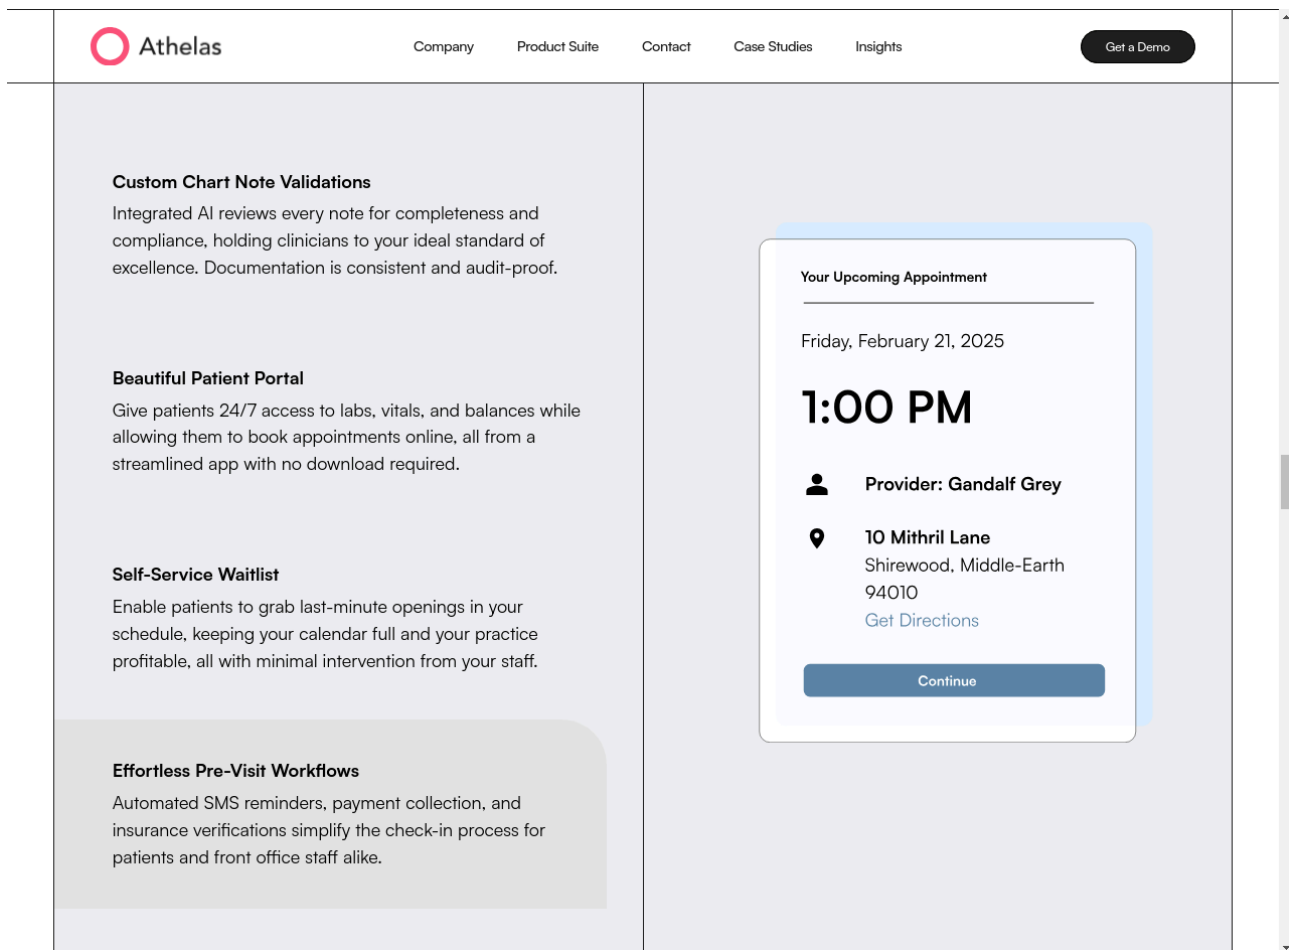

This sub-section describes the Beautiful Patient Portal, which gives patients 24/7 access to labs, vitals, and balances, allowing them to book appointments online.

Requirements:

- **Content:** Reproduce the title and descriptive text.
- **Visual Elements:** The patient portal interface should be represented by a grayed-out `div` placeholder, maintaining its dimensions and visual style.
- **Animations:** Any animations related to the patient portal functionality should be reproduced with placeholder animations.

7.6 Self-Service Waitlist

Screenshot:

Description:

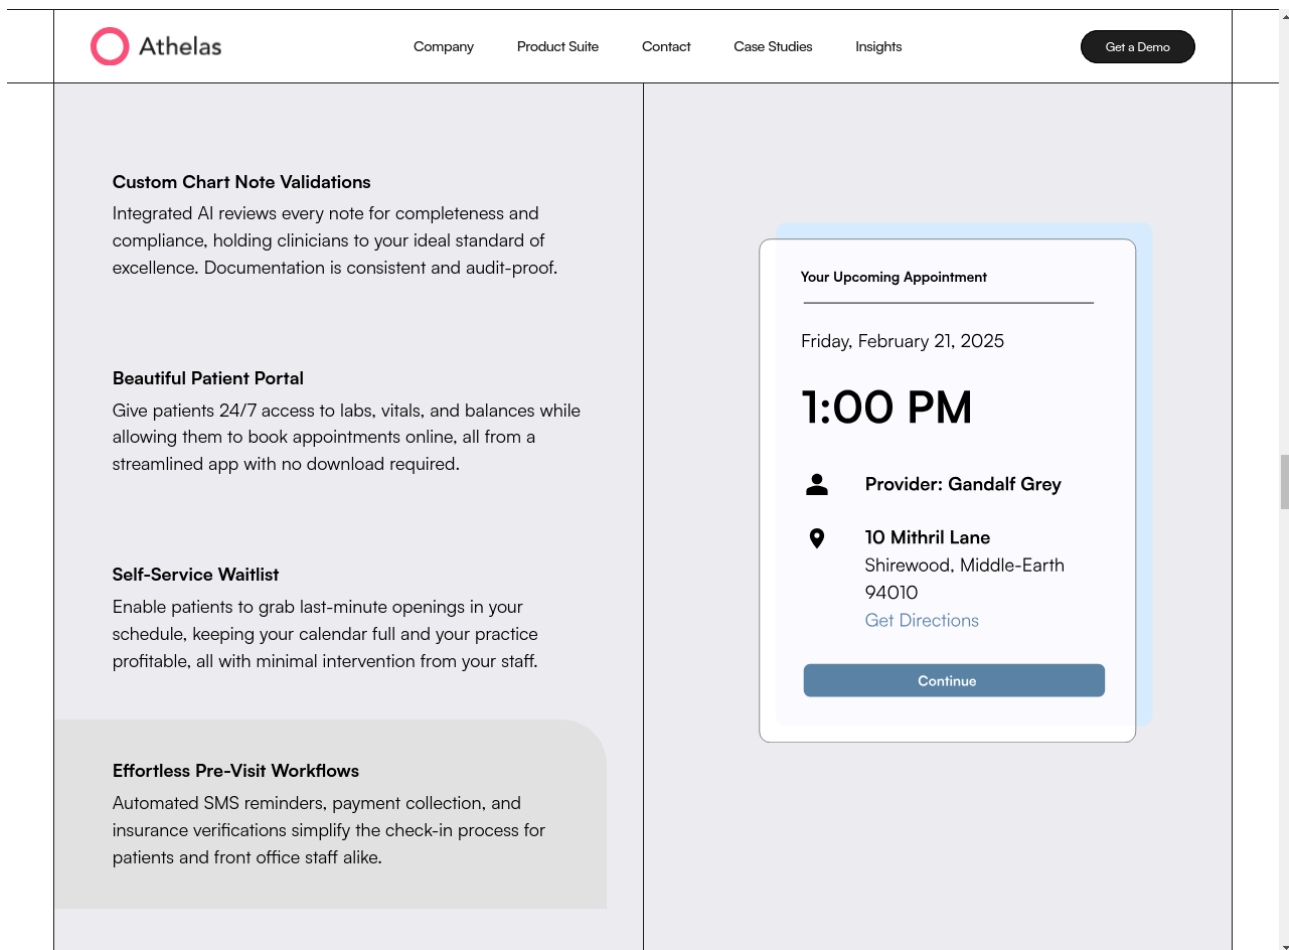

This sub-section describes the Self-Service Waitlist, enabling patients to grab last-minute openings in the schedule.

Requirements:

- **Content:** Reproduce the title and descriptive text.
- **Visual Elements:** The appointment booking interface should be represented by a grayed-out `div` placeholder, maintaining its dimensions and visual style.
- **Animations:** Any animations related to the waitlist functionality should be reproduced with placeholder animations.

7.7 Effortless Pre-Visit Workflows

Screenshot:

Description:

This sub-section describes Effortless Pre-Visit Workflows, which include automated SMS reminders, payment collection, and insurance verifications.

Requirements:

- **Content:** Reproduce the title and descriptive text.
- **Visual Elements:** No specific visual element for this sub-section in the provided screenshot, but ensure consistent styling with other feature descriptions.
